Two Roads Ahead

Uncle Sam has given American industry a job—to provide enough guns, tanks, planes and ships fast enough to win this War of Survival.

Industry can't do its job for national security—as well as it should—unless it is free to hire, promote, keep—the best American workers it can find.

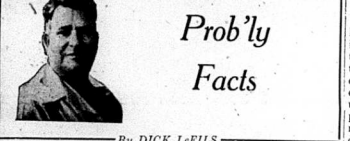

What has become of the desires of the workers themselves as expressed by the full 25 percent of the employees of the company in New Jersey who dared to refuse to pay their dues in a union local while exercising their right to work?

The National War Labor Board on April 8 imposed "maintenance of union membership" on that New Jersey company, manufacturers of vital machine tools. This ruling compels the employer to discharge any employee who withdraws from the local union.

This sort of action does not help to win the war. This method of arriving piecemeal at a fundamental policy, as followed by the War Labor Board, does not get us any nearer to a set policy for labor relations for the duration of the war. It does not give industry the freedom from anxiety about "What will the Board do next?" so essential to the progress of the production of war material. It separates us farther from our goal of victory.

Only the elected representatives in Congress can decide which of two roads our nation shall follow—whether we shall establish a basic national policy which will prevent and conflict with our one objective, to win the war as speedily as possible, or rather shall encourage time-consuming, costly excursions into such questions as maintaining the strength of unions when the national strength is at stake.

The time has come for Congress to provide concrete evidence of its own realization of the nation's goal; subordinating all else toward winning the war.

Prob'ly Facts

By DICK LEFILS

Well our political race is getting warmer as well as the weather for just a few more days and we will go to the polls and elect a new set of officers or put the tag on the old ones for another term.

You have heard where some fellow has thrown his hat in the ring to become a candidate for some office, well that didn't exactly happen up at Palokke on the mayor's race that being run, for one of the candidates happen to be a lady in the race, so she just tossed her bonnet in the ring, and as far as I know she's gonna run just as far as the man, for as well as I'm able to find out both of 'em have some mighty good planks in their platforms.

Personally I think we should have more women policemen than we have women mayors, for I happen to be acquainted with several that taste a mighty wallop in some cases. In fact, I have seen men weighing a couple hundred pounds or more beat up a barroom full of so-called professional sluggers and go home only to meet defeat from a woman weighing less than a hundred pounds, and if that isn't what you'd call pockin' a wallop, I don't profess to know my women.

Our member on the school board is out for election this time in the Belle Glade and Palokke district. Ralph Freeman is our candidate who's running against the old member Carmen Salvatori, who lives up at Palokke (about twelve miles distance) Ralph has been staying up at Palokke so much during the campaign and Carmen staying so much in Belle Glade's territory (Ralph's home town) until I have negotiated an agreement among the two to where they can save some money as well as wear and tear on their tires. The agreement is only to last during the duration of the campaign. The agreement is for Ralph to be able to spend the night as well as eat his meals at Carmen's home while Carmen is campaigning in Carmen's home territory. And in exchange for the lodging and meals that Ralph's home town is to pay for by the same means of giving lodging and meals to his opponent while he is campaigning. Ralph's home town is to pay for by the same means of giving lodging and meals to his opponent while he is campaigning. CHARLES M. STEWART CAMPAIGNS FOR STATE RAILWAY COMMISSION

World War Veteran Receives Strong Support from all Sections

Charles M. Stewart, of Manatee county, who recently announced his candidacy for state railroad commissioner, in group one, in the forthcoming Democratic primary on May 5, has been visiting in Belle Glade meeting old friends and campaigning this week.

Mr. Stewart is a native of Florida, is 53 years old, and is a peace officer of more than 20 years' experience. He received his position of county traffic officer of Manatee county to devote his full time toward the race. He is married and has a wife and six children.

During World War No. 1 Mr. Stewart served in the Navy, crossing the Atlantic 20 times and is a member of the American Legion.

Belle Glade supporters of Mr. Stewart, in commenting on his race for the railroad commission, said he was receiving strong support from all sections of the state, and that he had received favorable comment in more than one hundred Florida newspapers and publications on his race for the office.

Upon his departure from Belle Glade Mr. Stewart said: "I have thoroughly enjoyed my visit in Belle Glade and I certainly appreciate the fine hospitality extended me while here." "I shall be grateful for any and all support given my candidacy and if elected I promise an intelligent and economical administration of the affairs of the office."

JOHN T. PICKETT

CANDIDATE FOR

County Commissioner, Glades District

Believing that my professional training and knowledge of public affairs qualify me to serve you efficiently as County Commissioner of the Glades District, I respectfully solicit your vote in the Democratic Primary, May 5.

My qualifications are:
Twenty years experience as a civil engineer in responsible charge of work. A majority of this time has been spent on the construction of roads, streets and other improvements in the Everglades district of Palm Beach County, while serving in the capacity of engineer or as construction superintendent for the state, county and cities.
I am a property owner, married, the father of three children and veteran of World War 1.

IF ELECTED I WILL

At all times co-operate with committees or individuals seeking through constructive criticism the betterment of my district and county.
Co-operate with the other commissioners on all worthy causes.

Insist that all county contracts be awarded to the lowest responsible bidder.
Make public all transactions of the board of county commissioners.

Insist that all county affairs within my jurisdiction be conducted with efficiency and economy.

Institute a progressive county road construction program in this district with a view to making access to the state roads an incident not an adventure. In this connection I am of the opinion that the coast has a sufficient number of county roads to provide for expansion for several years to come—most of which have been constructed within the last few years. I also definitely believe that through work and co-operation with the people of this district that we can convince the people and commissioners of the other districts of this section's value to the county, state and national government, in its production of foodstuffs and its future value and the absolute necessity of county roads if we are to develop to our fullest proportions in assisting our nation in this critical time. This district has outgrown our present system of county roads and it is vital that every effort be exerted to correct this condition.

At all times remember our obligations to the unfortunate, the sick and the infirm and provide for their comfort at all times.

Be not unmindful that I am a servant of the people.

District 1, up until the past year, however, was comprised of the northern section of the coastal area of the county; and only a part of the Everglades—a condition which naturally worked to the disadvantage of those schools of the Glades under the jurisdiction and supervision of coastal members of the Board in the matter of allocation of funds for maintenance and improvements.

During the past year, with the re-districting, and the placing of all Everglades schools within this district, the allocation of funds has been more equitably distributed, with the result that all schools of the Everglades are now in better material condition than at any time in their history and we are exceptionally proud to have been one of the instigators of the change, and worked hard in bringing it about.

First Church Christ Scientist Announces Program For Sunday

"Everlasting Punishment" is the subject of the Lesson-Sermon which will be read in churches of Christ Scientist, throughout the world on Sunday, May 3.

The Golden Text is: "The Lord is known by the judgement which he executeth: the wicked is snared in the work of his own hands" (Psalms 9:16).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "Be not deceived; God is not mocked: for whatsoever a man soweth, that shall he also reap. For he that soweth to his flesh shall of the flesh reap corruption; but he that soweth to the Spirit shall of the Spirit reap life everlasting." (Gal. 6: 7-9).

The Lesson-Sermon also includes the following passage from the Christian Science text book, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "They, who know not purity and affection by experience, can never find bliss in blessed company of Truth and Love simply through translation into another sphere. Divine Science reveals the necessity of sufficient suffering, either before or after death, to quench the love of sin" (p.36:1-6).

Many trouble calls and repair bills will be avoided if you make sure that:

1. Fuses and fuse clips are tight, as loose fuse contact or loose fuse clips cause heating of the fuses and early failure.

2. Unnecessary strains on cords and lead wires are avoided.

3. Plugs are always firmly and fully inserted in their receptacles.

4. Switches are wiped free of grease and are properly lubricated.

5. Rough handling and twisting of thermostats is avoided.

Pulling on a cord to remove a plug is an obvious DON'T. Connections strain, break and the appliance fails to operate.

Watch this column each week for pointers on efficient operations and maintenance of your appliances.

Let's Look at the Record!

WHY DOES OUR CONGRESSMAN IGNORE THE CHALLENGE TO EXPLAIN, IF HE CAN—

How, since he was elected to Congress on a promise to the old people of this district that he would get old age pension for them, he approved a lifetime pension for himself, although he failed to redeem that pledge to the old folks?

Why he would have abandoned our army of selectees in November, only a month before Pearl Harbor in December, when every patriotic American must have realized that war was imminent?

Why, when the most momentous question that has ever faced our Congress—a vote on the declaration of war against Germany—our Congressman was recorded as "NOT VOTING!"

If you approve these things, you will have a chance on May 5 to record your approval at the polls. The Constitution provides that our Congressmen are elected every two years. They are our direct representatives in government. That is why they have to give an accounting of their stewardship so often.

If you do NOT approve your Congressman's record—and it is recorded in the CONGRESSIONAL RECORD—then elect a man who served 22 months in the army in World War No. 1 and who will give his utmost to the support of our President and our Military leaders in prosecuting this war!
